INSTITUTE FOR CREATIVITY, ARTS, AND TECHNOLOGY

Spatial Audio Workshop

Friday, August 14, 2015, 7:30–9:30 PM
Cube, Moss Arts Center
Limited capacity; seating on a first-come, first-served basis
Free

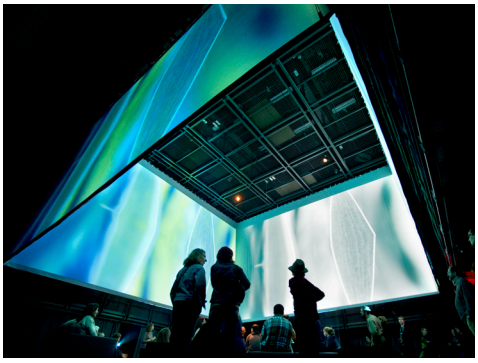

Six pioneers in sonic technology explore the capabilities of one of the most complex multi-channel audio systems in the world.

Featuring researchers from Berklee College of Music, Rhode Island School of Design, the London Metropolitan University, Instituto Technologico de Monerrey in Mexico City, and the University of Cincinnati.

Institute for Creativity, Arts, and Technology (ICAT)

Presenting one-of-a-kind sonic creations designed to push the limits of audio technology. Immerse yourself in 3-D soundscapes that utilize 147 speakers suspended throughout four levels of jaw-dropping architecture. This unprecedented research is conducted in an unparalleled venue designed to sonically melt your face off and push the boundaries of spatial audio technology.
